

Dura-Trac SE by Sur-Loc Flooring Systems

Raising Portable Flooring to New Heights!

One Floor = Multiple Applications

- Laydown flooring
- Portable roadway
- Elevated flooring

Unbeatable Strength

- Bears the weight of forklifts and other heavy equipment
- Won't dig-in like other plastic flooring
- 3" thick and steel-reinforced, but still easy to handle

This 4x8 panel is made of HDPE with 10% glass for added strength and durability

Fast to install and even faster to remove

Heavy duty load capacity

Patented slide lock system holds the panel securely in place

Excellent water dispersment capabilities

Slip-resistant textured top

Available in black, cream, green, and grey

Adjustable in 2' increments on the length

Dura-Trac SE Elevates the Industry

No more scheduling the floor installation around the tent construction. Because of Dura-Trac SE exceptional strength you can drive on the floor to raise your tent or structure.

Whether it's a wedding, sporting event or other special event, Dura-Trac SE will solve your flooring needs.

Dura-Trac SE makes a great laydown floor. Carpet can be easily stapled to the surface or you can use the natural finish of the floor.

Dura-Trac SE easily integrates with other modular flooring and accessories

Need an elevated floor? Turn to Dura-Trac SE. It's 1000 Lbs per square foot in air handling capacity can hold tents and structures up to 30 meters wide with the proper bracing and reinforcement.

Dura-Trac SE on the National Mall in Washington, D.C.

If it's a portable roadway for access into these sensitive areas, you're looking for; Dura-Trac SE is there. With over 25,000 Lbs per square foot load capacity on bearing ground, it will not only hold those forklifts and trucks, but will protect the ground they're driving on.

Sur-Loc Flooring Systems also does custom work to produce extension pieces that will fit to the exact footprint of your structure thus reducing the need for expensive cassette type flooring.

Dura-Trac SE can also be easily welded and repaired. No more throwing away wood that has holes from stakes and electrical. The hot air welder is easy to use and runs on a 110 v circuit. Repairs can be done in the field or in the off-season. Sur-Loc will sell various size plugs for those repairs.
